(1) We do not “control” and are not an “affiliate” of any of our investments, each as defined in the Investment Company Act (the “1940 Act”).

(2) \$ represents security position traded in par amount.

(3) Fair Value is determined in good faith in accordance with the Company’s valuation policy and is reviewed and accepted by the Company’s Board of Directors.

(4) Security is exempt from registration under Rule 144A of the Securities Act of 1933.

(5) The preferred shares are considered an equity position. Equity investments are entitled to recurring distributions which are generally equal to the remaining cash flow of the payments made by the underlying company’s securities less contractual payments to debt holders and company expenses. The estimated effective yield indicated is based upon a current projection of the amount and timing of these recurring distributions and the estimated amount of repayment of principal upon termination. Such projections are periodically reviewed and adjusted as needed. The estimated effective yield may ultimately not be realized.

(6) Investments determined using significant unobservable inputs (Level 3). The value of such securities is \$9,732,738 or 6.74% of net assets.

(7) Currently non-income producing security.

(8) Investments are income producing assets unless otherwise noted by footnote (7).

(9) Cost values reflect accretion of original issue discount or market discount, and amortization of premium.

(10) Includes \$45,000,000 in bank loans from Texas Capital Bank.

– Effective March 1, 2018, Howard Bancorp, Inc. acquired First Mariner Bank. This transaction resulted in an exchange of 50,000 shares (par value \$1,000,000) of Priam Capital Fund I, L.P. for 83,119 shares of Howard Bancorp, Inc.

† As of September 30, 2018, the cost basis of investment securities owned was substantially identical for both book and tax purposes. Gross unrealized appreciation of investments was \$3,377,652 and gross unrealized depreciation was \$1,901,471 resulting in net unrealized appreciation of \$1,476,181.

Notes to Schedule of Investments (unaudited)

Investment Valuation— The most significant estimates made in the preparation of the financial statements of StoneCastle Financial Corp. (“SCFC” or the “Company”) are the valuation of equity and debt investments and the effective yield calculation with respect to certain debt securities, as well as the related amounts of unrealized appreciation and depreciation of investments recorded. The Company believes that there is no single definitive method for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments that SCFC makes. The Company is required to specifically fair value each individual investment on a quarterly basis.

The Company complies with ASC 820-10, Fair Value Measurements and Disclosure, which establishes a three-level valuation hierarchy for disclosure of fair value measurements. ASC 820-10 clarified the definition of fair value and requires companies to expand their disclosure about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition. ASC 820-10 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (i.e. the “exit price”) in an orderly transaction between market participants at the measurement date. ASC 820-10 also establishes the following three-tier fair value hierarchy:

- Level 1 — Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;
- Level 2 — Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an active market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data; and
- Level 3 — Unobservable inputs for the asset or liability to the extent that relevant observable inputs are not available, representing the Company’s own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

To the extent securities owned by the Company are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Securities traded in inactive markets or valued by reference to similar instruments are generally categorized in Level 2 of the fair value hierarchy.

The availability of valuation techniques and observable inputs can vary from security to security and is affected by a wide variety of factors including the type of security, whether the security is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Those estimated values do not necessarily represent the amounts that may be ultimately realized due to the occurrence of future circumstances that cannot be reasonably determined. Because of the inherent uncertainty of valuation, those estimated values may be materially higher or lower than the values that would have been used had a ready market for the securities existed. Accordingly, the degree of judgment exercised by SCFC in determining fair value is greatest for securities categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement. The valuation levels are not necessarily an indication of the risk associated with investing in those securities.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, SCFC's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. SCFC uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

SCFC will determine fair value of its assets and liabilities in accordance with valuation procedures adopted by its Board of Directors. The Company may utilize the services of one or more regionally or nationally recognized independent valuation firms to help it determine the value of each investment for which a market price is not available. SCFC's Board of Directors will also review valuations of such investments provided by StoneCastle Asset Management LLC, the Advisor to the Company ("the Advisor"). To the extent SCFC invests in securities for which market quotations are readily available, such market value will be used to value those securities. If a market value cannot be obtained or if SCFC's Advisor determines that the value of a security as so obtained does not represent a fair value as of the measurement date (due to a significant development subsequent to the time its price is determined or otherwise), fair value shall be determined pursuant to the methodologies established by our Board of Directors. In making these determinations, the Company may engage an independent valuation firm from time to time to assist in determining the fair value of our investments. The methods for valuing these investments may include fundamental analysis, discounts from market prices of similar securities, purchase price of securities, subsequent private transactions in the security or related securities, or discounts applied to the nature and duration of restrictions on the disposition of the securities, as well as a combination of these and other factors.

Credit Securitization and Pooled Equity Interests— SCFC may acquire preferred share positions in credit securitizations or pooled equity interests. In valuing such investments, SCFC attempts to obtain a minimum of two marks provided by recognized industry brokers as a primary source, supplemented by actual trades executed in the market at or around period-end, as well as the marks provided by the broker who arranges transactions in such investment vehicles. These positions may result in a layering of leverage in overall structure. The more leverage is employed, the more likely a substantial change will occur in the Company's net asset value ("NAV"). Accordingly, any event adversely affecting the value of an investment would be magnified to the extent leverage is utilized.

The Company's assets measured at fair value subject to the disclosure requirements of ASC 820-10-35 at September 30, 2018, were as follows:

	TOTAL FAIR VALUE AT 9-30-18	LEVEL 1 QUOTED PRICE	LEVEL 2 SIGNIFICANT OBSERVABLE INPUTS	LEVEL 3 SIGNIFICANT UNOBSERVABLE INPUTS
Term Loans	\$27,663,125	\$ —	\$27,663,125	\$ —

Total Investments in Securities	\$186,893,267	\$21,829,791	\$155,330,738	\$9,732,738

The Level 3 categorized assets listed above have been valued via the use of a) independent third party valuation firms, or, b) fair valued as determined in good faith by the Board of Directors, in accordance with procedures established by the Board of Directors.

For fair valuations using significant unobservable inputs, U.S. generally accepted accounting principles ("U.S. GAAP") requires SCFC to present a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchase and sales, and transfers in and out of Level 3 during the period. Transfers in and out between levels are based on values at the end of a period. U.S. GAAP also requires SCFC to disclose amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. A reconciliation of Level 3 investments is presented below:

	COMMON STOCK	LIMITED PARTNERSHIP INTEREST	PREFERRED STOCK	TOTAL
Balance at December 31, 2017	\$1,326,160	\$ 846,000	\$ —	\$2,172,160
